About JIBC

Japan IT Business College is a vocational school opened in 2018 and approved by Okayama Prefecture that has two specialized courses and two departments in the fields of commercial practice, education, and social welfare. With the development of AI, it is necessary to develop highly-skilled human resources. The Japanese market is shrinking and the global market with a population of over 7 billion people continues to expand. 150 years have passed since the Meiji Restoration, and in the midst of dynamic changes, we support students regardless of nationality or age. Let's learn about regional revitalization while experiencing international exchange as a team.

Study Information Technology abroad in Setouchi

In order to get a job in Japan or in your home country, you will learn important IT skills such as APP Development, System Development, and Web Design in the IT courses of the Department of International Business. The Foreign Language Course of the Department of International Business offers practical lessons to improve your English skills necessary to work in hotels, the tourism industry, and global companies. In the Department of Caregiving & Welfare, our goal is to pass the National Exam for Care Worker Certification. Students can learn business Japanese through all of our lessons. After graduation, students of the Department of International Business will be able to find jobs such as IT engineering, interpreting, and hotel / ryokan front desk clerk. Students in the Department of Caregiving & Welfare will be able to find jobs at nursing care facilities.

Point 1

Acquire the skills needed to land in-demand jobs for the future. Our staff will also provide guidance and support for your career goals.

Our well-prepared curriculum teaches essential knowledge and skills to help you enter industries that have rapidly developed during the Covid-19 Era, such as IT, caregiving, and much more. Learn about blockchain technology and website development technology and get a job in the IT industry. Improve your languages skills (e.g. English and Japanese) and become a corporate interpreter. Work in Japan as a caregiver, a profession that is unlikely to be replaced by AI and machines. Find the right job from the many choices offered by our group's HR companies.

Point 2

Here you'll find a dynamic learning environment, safe from natural disasters and surrounded by nature!

Okayama prefecture has one of the lowest risks of disasters in all of Japan. Okayama is a comfortable place to live in and has earned a reputation in recent years as a destination for immigrants. Enjoy the local delicious fruits, such as white peaches and grapes throughout the year. And relieve daily stress with many attractive hot springs.
